

Help shape proposals for Warwick District's Smoke Control Areas

Smoke Control Areas can help improve local air quality by reducing the pollution that comes from burning wood and solid fuels in homes and businesses.

Any changes would not prevent people from using wood-burning stoves or solid fuels, provided they meet the relevant requirements.

We'd like to hear your views on the proposed changes to Warwick District's Smoke Control Areas.

Visit www.warwickdc.gov.uk/smokecontrolareas to see the proposals and have your say.

For a paper copy of the survey, please call **01926 456741**. The consultation closes on **Monday 5 October 2026**.
